Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ritland (2003/0236447) in view of Hoftman et al. (6,354,995).

With respect to claims 4-6, Ritland discloses a retractor (10) a pair of pedicle screws (S) for attachment to pedicles and a pair of guide member (33,T) in poly-axial engagement with the a respective screw so that the guide member has a range of movement defining a cone with respect to the longitudinal axis of the screw; as set forth in para [0006] and para [0047-0062].

It is noted that Ritland did not teach of a retractor having a closed and open positions and the closed position presenting a substantially linear form, as claimed by applicant. However, since Ritland stated that any retractor could have been used and since Hoftman et al evidences the use of a retractor having a closed and open positions and the closed position presenting a substantially linear form to increase the effective diameter of an orifice.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Ritland, as taught by Hoftman et al to increase the effective diameter of an orifice.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose or reasonably teach a retractor body having two elongated channels and guide members passing through the corresponding channels.

Claims 1-3 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
